

20th Century Churches

High Wycombe, Terriers - St. Francis of Assisi

The church was completed in 1930, the brainchild of the Reverend Francis Field. The style is best described as modern Gothic with an early Christian flavour. The church has many unique features but the overall effect is one of monumental simplicity.

Milton Keynes - Church of Christ the Cornerstone

The basic design of the church, completed in 1991, is a circular auditorium lit by a huge dome and surrounded on four sides by series of functional rooms. Four triangular shaped courtyards provide light within the complex.
